

Support - Resistances

1594/1586 – 1610/1620

Market today

“Limited short-term upside. Follow US inflation report.”

The SET is seen to have short-term limited upside around 1,610–1,620; beware of weakening by profit-taking to reduce risk before the US inflation report on Wednesday. Additionally, US employment report last week showed a higher rise than expected, generating concerns about the Fed's interest rate hike path. The lower bound is at supports of 1,594 and 1,586 and if it goes lower, it would be a negative signal.

Today's highlights

- US nonfarm payroll rose more than expected in July leading to the return of worries about the Fed's interest rate path with a possible raise of 75bps on September 20-21.
- China trade balance rose to a record high after July exports grew 18% YoY, relieving concerns of a slowdown in world demand.
- Follow the China-Taiwan situation: China has closed air and water space for war drills on August 4-7, which could affect supply chains.
- The Ministry of Labour is looking at raising minimum wage 5-8% this month, expected to take effect this year.
- July inflation was 7.61%YoY, lower than expected, so the MPC may raise interest rate by just 25bps at its August 10 meeting.
- This week to follow: US and China inflation in July on Aug 10, US PPI in July on Aug 11 and 2Q22 UK GDP on Aug 12.

Strategy today

Financial markets have begun to relax after US core inflation and commodity prices have started to slow, making it likely that the Fed will change its stance to a more relaxed monetary policy. However, the SET this week is expected to continue volatile on speculation on 2Q22 earnings, with an eye on a rate hike signal at the monetary policy committee meeting on August 10. We recommend “selective buy” in stocks with specific positive drivers and solid earnings recovery.

Trading today

Weekly portfolio: As the market is still in the quarterly report season, we recommend stocks with specific positive drivers and good profit momentum:

- 1) stocks that benefit from recovery in tourists and whose 2Q22 is expected to grow well both YoY and QoQ – ERW, MINT, CRC and AOT;
- 2) stocks that benefit from the upcycle in interest rates – BBL, KBANK and KTB.
- 3) energy stocks whose 2Q22 earnings are expected to show good growth and who are interesting because of the fall in oil price – PTT and BCP.

In the short term, we recommend avoid or be wary of stocks with negative factors pressuring earnings and stock prices:

- 1) stocks affected by a downward trend in commodity prices after supply problems unravel such as palm oil (UVAN, UPOIC, VPO, CPI and LST) and starch (UBE, TMILL and TWPC);
- 2) stocks whose forecasts are likely to be brought down after 2Q22 earnings are released – NRF, TU and TRUE.
- 3) shipper stocks (PSL and TTA) that are affected by negative sentiment from the decrease in BDI, which has now fallen for 10 days, the 10th day losing 2.7%DoD to close at 1,560, a six-month low.

Daily focus

BBL: We expect it to gain the most benefit from an upward trend in interest rates and to be the only commercial bank to show HoH growth in 2H22. It will grow strongly YoY from its high provisions in 1H22, plus high lending in 2H22, wider NIM, higher interest rates and lower asset quality risks than other banks.

SCGP: We expect 3Q22 core profit to show strong growth both YoY and QoQ off last year's low base, raising product prices to compensate for higher costs, better domestic demand and more exports to China. It will also book profit from Peute subsequent to the acquisition.

Today's reports

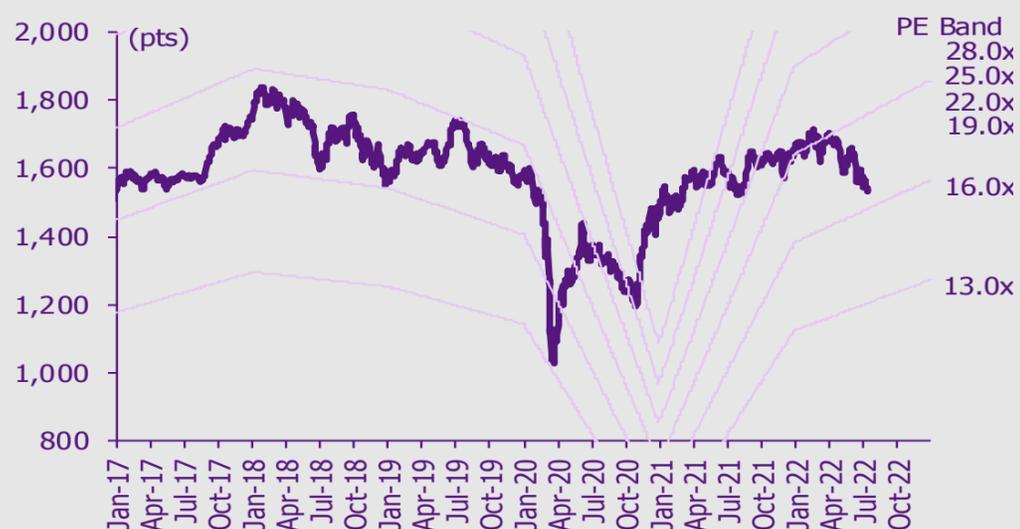

AOT – Preview 3QFY22: Losses down YoY and QoQ

STANLY – 1QFY23: Weak YoY and QoQ

What to watch

| Date | Event |
|--------|---|
| 10 Aug | Economic release: JP – PPI for Jul, US – CPI for Jul, crude oil inventories, CN – CPI and PPI for Jul Event: BoT's MPC meeting |
| 11 Aug | Economic release: US – PPI for Jul, unemployment claims Event: Announcement date of August 2022 quarterly MSCI index review |
| 12 Aug | Economic release: EU – Industrial production for Jun |

Futures and Options trading carry a high level of risk with the potential for substantial losses, and are not suitable for all persons. Before deciding to trade Futures and Options, you should carefully consider your financial position, investment objectives, level of experience, and risk appetite if Futures and Options trading are appropriate. The possibility exists that you could sustain a loss of some or all of your initial investment. You should be aware of all the risks associated with Futures and Options trading, and you are advised to rely on your own judgment while making investment decision and/or should seek advice from professional investment advisor if you have any doubts.

This document is delivered to intended recipient(s) only and is not permitted to reproduce, retransmit, disseminate, sell, distribute, republish, circulate or commercially exploit the Information in any manner without the prior written consent of SCBS.
