Absolute Clean Energy
Public Company Limited

Bloomberg ACE TB
Reuters ACE.BK

Shunned by the market

ACE's share price is down 15% YTD to a near-record low, far below the SET's gain of 1%, indicating market pessimism on a 20% YoY fall in 9M24 core earnings, plus more challenges in the renewable power sector, including regulatory changes and competition. Although we remain positive on its aim to reduce air pollution as well on as its earnings outlook, we stay Neutral on the stock due to lack of near-term catalysts. We cut TP to Bt1.50 from Bt3.60, switching to valuation via EV/EBITDA (2025F) of 8.6x to better reflect near-term profitability as valuation via the conventional DCF is challenging in today's market.

3Q24 results recap. Net profit was Bt111mn, pulled down 65% YoY and 50% QoQ on FX and derivatives losses of Bt198mn. Core profit increased 12% YoY and 48% QoQ as fewer maintenance shutdowns led to higher electricity sales from biomass power plants. Gross margin of these plants rose to 27% in 3Q24 from 24.3% in 2Q24, lifting overall gross margin to 26.6% in 3Q24 from 25.4% in 2Q24. Gross margin at MSW power plants dropped to 38.3% in 3Q24 from 40.7% in 2Q24 on lower revenue from electricity sales. Revenue from MSW also dropped 16% YoY as the adder expired in 4Q23. 9M24 core net profit was Bt646mn, down 23% YoY without revenue from the MSW adder.

More solar capacity to generate revenue in 4Q24. Management said six more solar power plants, with installed capacity of 71.25MW, will start commercial operations in 4Q24, bringing the total number of projects in operation to 31 (349.08MW) by end-2024. These projects were awarded in the first round of renewable energy auctions in 2022. Still under development are 58 more projects (>298.9MW), most of which will be operational by 2026. Some of these will come online in 2025, some in nearly every quarter, both MSW and solar farms. ACE also won another concession for municipal waste management in Khonkaen (Kudnamsai) with potential to develop a 9.9MW-MSW power plant, pending a PPA.

2025F earnings outlook. We expect operating profit to improve in 2025, backed by new projects coming on line in 2024-25, chiefly solar, and more stable operations at biomass and MSW plants. We expect 2025 core profit to grow 36% YoY to Bt1.2bn. Management did guide to a continued increase in its net debt/EBITDA as it will need to draw down more loans to finance the new projects. The ratio is expected to peak at 6-6.5x in the next 2-3 years, though this will be managed to maintain its credit rating.

Switch valuation method to EV/EBITDA multiple. We switch our valuation method from DCF-based to EV/EBITDA-based to reflect its near-term profitability. We derive a new TP of Bt1.5/share, based on 3-year average of 8.6x EV/EBITDA (down from Bt3.6). At our TP, the stock will be trading at 12x P/E (2025F), in line with its peers in the Thai market.

Key risks. 1) Delays in construction and startup of power projects in the pipeline, 2) higher feedstock cost for biomass plants, 3) higher investment costs and lower investment returns than expected, and 4) changes of the government policy on renewable energy.

Value proposition

ACE is a holding company for renewable power plants for the Songmetta family, one of Thailand's long-established exporters of wood chips. Via wholly owned subsidiaries, it operates 24 power projects with total capacity of 277.6MW; more than half is renewable power (biomass, municipal solid waste, or MSW, and solar) and the rest is gas-fired SPP cogeneration. The proportion of renewable power plants will go up over time as several projects in the pipeline come on stream. The key advantage is its in-house R&D to increase plant efficiency starting from plant design and ranging to feedstock selection and mixing formula. The strong ties with communities around the power plants underwrite feedstock (agricultural waste) reliability in the long term, leveraging the Songmetta Group's expertise.

Business outlook

The Provincial Electricity Authority (PEA) has finally returned eight PPAs, plus another one that will be acquired later from its partner, for its VSPP-biomass projects. This reflects the government's commitment to attaining 51% of new electricity capacity from renewable power plants by 2037. These plants are scheduled to commence operation within three years or by Dec 2026. ACE won 50MW capacity in the Community Power Plant (CPP) pilot project whose 20-year PPA is with the Provincial Electricity Authority (PEA). These power projects will gradually start up by 2026. In addition, more solar farm projects were awarded with PPAs were fully signed. In all, the company's total installed capacity will increase to >647.98MW by end-2027 from 277.83MW currently.

Bullish views	Bearish views
1. Efficiency improvement at existing power plants, including three acquired biomass power plants, will continue to support earnings growth.	1. Slower than expected execution of new power plants that were committed during the IPO, including more PPAs for VSPP-biomass and SPP hybrid power plants which are being negotiated with the electricity authorities.
2. Capacity expansion over 2024-27 will be the earnings driver over the next five years.	2. Policy risks on renewable power plants could curb growth.

Key catalysts

Factor	Event	Impact	Comment
Capacity additions in the pipeline.	More signing of PPAs for SPP Hybrid and solar power projects is expected to take place in 2024. Other upside potential is solar and MSW projects in Thailand.	Positive	This should increase investor optimism about its ability to deliver earnings growth as expected during the IPO. This has been delayed for some time from initial plan.
Further improvement of feedstock cost	ACE targets reducing feedstock cost of biomass power plants.	Positive	ACE has continued to reduce feedstock cost over the past 3-5 years by changing the mix of feedstock to minimize the heat rate of its power plants.

Sensitivity Analysis

Factor	Earnings impact	TP impact
Gross margin (+1%)	+5.7%	+Bt0.06/share

Our view on ESG

We view that ACE provides concrete targets on environmental and social issues with a committed timeline and actual performance relative to its targets. We view its management and governance as satisfactory, reflecting management's expertise and experience in the business, with a diverse board of directors and transparency with stakeholders.

ESG Ratings and Indices

Bloomberg ESG Financial Materiality Score	3.41 (2023)	CG Rating	DJSI	SETESG	SET ESG Ratings
Rank in Sector	13/63	ACE	5	No Yes	AA

Source: Thai Institute of Directors and SET

Environmental Issue (E)

- ACE has set sustainability targets with Net Zero target by 2050. The company plans to increase power capacity focused on clean energy plants, but the specific target was not disclosed due to the government's inconsistent policies on renewable energy.
- ACE's renewable power business helped alleviate chronic environmental problems in Thailand. Its biomass power business helped in reducing open agricultural burning which lessened PM2.5 concentration in Thailand. The MSW power plants could solve the problem of waste management.
- The company is moving toward Carbon Neutral and to Net Zero emissions in the future. This includes the purchase of agricultural waste from farmers around its power plants. The company purchased >1.99mn tons of agricultural waste materials in 2023. This helped reduce open-area burning by farmers, equivalent to a reduction in open-area burning by 667,822.12 rai. This is estimated to reduce carbon emissions by approximately 841.8ktCO₂e.

Social Issue (S)

- ACE provides eucalyptus seedlings from drought-tolerant, disease-resistant, fast-growing cultivars to farmers in 15 areas surrounding the power plants for farmers to plant in the fields, ridge, boundary, canal, rai, end of the field, or unused wasteland. This helps generate additional income and improve the quality of life for the community and creates a sustainable circular economy.
- ACE continues to invest in projects that are beneficial to the economy, society and sustainable coexistence with the community. These include 18 biogas power projects which were selected by the Energy Regulatory Commission under the Community Power Plant scheme in 2021. This will generate more income for the community under a contract farming scheme.
- ACE maintains its good record in occupational health and safety with zero accidents and lost-time injuries.

Governance Issue (G)

- ACE's board of directors consists of 10 directors, i.e. 5 independent directors (50% of the entire board), 1 non-executive directors, and 4 executive directors. This includes 3 female members (30% of the entire board).
- ACE has been rated "Excellent" (5 stars) by the Thai Institute of Directors in 2023.
- We view the company's social and governance practices as conforming to general industry standards.

Corporate Governance Report

The material contained in this publication is for general information only and is not intended as advice on any of the matters discussed herein. Readers and others should perform their own independent analysis as to the accuracy or completeness or legality of such information. The Thai Institute of Directors, its officers, the authors and editor make no representation or warranty as to the accuracy, completeness or legality of any of the information contained herein. By accepting this document, each recipient agrees that the Thai Institute of Directors Association, its officers, the authors and editor shall not have any liability for any information contained in, or for any omission from, this publication.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey result may be changed after that date. InnovestX Securities Company Limited does not conform nor certify the accuracy of such survey result.

To recognize well performers, the list of companies attaining "Good", "Very Good" and "Excellent" levels of recognition (Not including listed companies qualified in the "no announcement of the results" clause from 1 January 2023 to 28 October 2024) is publicized.
