 Bloomberg ticker: SETENERG

Fuel tariff cut slightly negative

The ERC has decided to lower the fuel tariff (Ft) rate on electricity by Bt0.03/unit for the period of January-April 2025. This will lower SPP margin and slice 0.08-1.3% off 2025 core earnings for power companies under coverage. However, we expect no further major cut in the Ft rate as the government needs to repay EGAT's outstanding debt, now at Bt85bn, limiting downside risk to SPP margin in the medium term. Our sector pick is GULF (TP Bt70), with solid 4Q24 and 2025 performance and we maintain Outperform on GPSC (TP Bt60) and Neutral on BGRIM (TP Bt24.5).

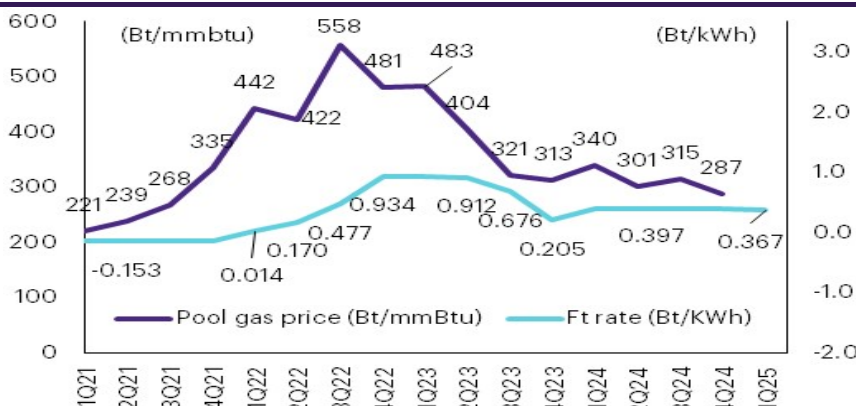

Regulator decides to reduce Ft. The Energy Minister asked all agencies to explore ways to further reduce electricity costs in order to ease cost of living and on November 24, after a public hearing, the ERC decided to revise Ft, which will cut electricity charges, for the period of January-April 2025. Ft will be reduced to Bt4.15 per unit from Bt4.18/unit for Sep-Dec 2024 as a New Year's gift to the public. The ERC will make a formal announcement later.

Small impact on the sector. The reduction in Ft rate will pose a small negative to SPP margins as most ASPs are linked to Ft rate, forcing SPPs to manage gas cost to generate margin. We assess the potential earnings impact of a cut in Ft (assuming stable gas cost) for the three power generation companies under coverage, GPSC, BGRIM and GULF. At GPSC, the Bt0.03/unit drop in the Ft (Jan-Apr 2025) will, by our estimates, cut profit by Bt60mn, equivalent to 1.3% of our 2025F. At BGRIM, profit will come down Bt24mn, equivalent to 1.0% of our 2025F, and at GULF, profit will be cut Bt20mn, equivalent to 0.08% of our 2025F. We expect no major reduction in Ft as the government needs to manage it to repay EGAT's outstanding debt, now at Bt85bn. This limitation limits the downside risk for SPP margin in the medium term. On the other hand, we see potential upside from pool gas price, which declined to Bt287/mmbtu in October from Bt301/mmbtu in September and Bt320/mmbtu in August.

GULF remains our top pick. We maintain our 3-month tactical rating of Outperform on **GULF**, reflecting its strong earnings growth in 4Q24 and 2025 backed by a steady addition of new capacity from new GPD and HKP projects and the potential benefit if the ERC reviews the bidding structure for phase 2 of the renewable energy scheme (3.6GW) and PDP2024 (35GW) plus gas-fired power plant replacement (2.6GW). We maintain our Outperform on **GPSC**, as the onset of a cyclic interest rate downtrend will be positive given the 35% of its debt that carries a floating interest rate (every 50bps decline in interest rate to provide earnings upside by 5% p.a.), and its low net debt/equity ratio will allow medium- to long-term growth investment. For **BGRIM**, we stay Neutral as we see no real earnings driver without a major capacity addition in the short term.

Key risks: Higher than expected gas cost and exchange rate volatility Key ESG risks are the environmental impact from exposure to fossil fuels, energy management, high greenhouse gas emission and nearby community impact.

The ft rate and pool gas price

Explanations

Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of October 14, 2024) are categorised into: companies that have declared their intention to join CAC, and companies certified by CAC.
